Good Day Everyone, I wanted to provide this update along with a couple of resources for documents. We will be out in the field during the weeks of October 17, October 24, and October 31, 2016 to conduct a subset of the soil boring activities and a subset of the surface water sampling activities. As information comes our way, we will share the data and documents.

1. The Final Site Sample and Analysis Plan was finalized in September and shared on September 13, 2016. It is also found on the website (see below) and in the Wilcox one drive folder.
2. The Wilcox Oil Company Web page now has documents available for download: early investigation reports, the Final SAP, the Final Direct Sensing and Geophysics Report, the final Architectural Cultural Report, and the community meeting slides, notes, factsheets. Some of these documents are also on the Wilcox one drive site. For the one drive, you may need to create a user name and password to access.
3. The passive gas data that was collected in August 2016, still being reviewed and will be uploaded by the end of the month.

As always, call with any questions.
